

Great News for ALL Carwash Owners and Operators!

New Value Added Benefits! Free Lunch!

Water Conservation Certification Program

NPCWA developed the Water Conservation Certification program to help ensure fair treatment of its members (equal treatment with other businesses as opposed to arbitrarily shutting down carwashes) during times of drought.

The program was passed into North Carolina Law (NC Statute G.C. 143-355.2(h1)) and is endorsed by the North Carolina Department of Environment and Natural Resources. This program is only available to NPCWA members. Members must have their washes certified annually. The Vehicle Wash Conservation Certification Program is a voluntary program, in which the wash owner/operator may request certification from and be recognized by the North Carolina Professional Carwash Association with regard to water conservation. The principal incentive to the professional vehicle wash owner is to receive "credit" for proactively conserving water not only during a drought but also throughout the year to allow continued washing during declared drought emergencies. An additional incentive is positive promotional signage, which can be placed at the business, to show participation in the program.

NEW VALUE ADDED BENEFIT FOR NPCWA MEMBERS THIS YEAR

For the regular NPCWA annual membership fee of \$250, you will receive a free annual affiliate membership in the Southeast Carwash Association (SECWA). The affiliate membership entitles you to the benefits of SECWA membership, but it is not a voting membership.

For NPCWA annual membership and a Full Voting Membership in SECWA, the combined annual fee is \$375—still saving you \$50.

Benefits of Membership

NPCWA LOOKS OUT FOR YOUR BUSINESS

~NPCWA maintains a watch in the State Legislature for issues that could affect the Carwash Industry and your business.

EDUCATIONAL AND NETWORKING OPPORTUNITIES

~Educational opportunities through Newsletters, Websites, Tradeshows and Meetings to keep you current and help you stay in the best position to be successful.

~Networking opportunities with your peers in the Carwash Industry. A membership directory to help you develop and maintain your network.

PUBLIC RELATIONS

~Educating the general public about the benefits of using professional carwashes—less water consumption than home washing, safer for our environment because there is no discharge of untreated water, etc. Promoting NPCWA members as important members of their local communities.

~Water Conservation Certification signage showing customers that they are dealing with an environmentally responsible business.
